DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submissions filed on 8/4/2008 and 11/20/2008 have been entered.

Claim Objections

Claim 74 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 68 recites a method using cell culture medium comprising "ascorbate or an ascorbate derivative." Claim 74, dependent from claim 68, recites that the ascorbate derivative may be "sodium ascorbate, ascorbic acid, or derivatives thereof." Thus, claim 74 encompasses compounds that are derivatives of the derivatives recited in claim 68. It is easy to envision, based on the breadth of the term "derivative", that derivatives of either sodium ascorbate or ascorbic acid could no longer be considered derivatives of ascorbate, and thus not read on claim 68.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or

Art Unit: 1633

improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 68 and 73-75 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 31, 33 and 39-51 of copending Application No. 11/932,052. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the limitations found in the instant claims can be found in the claims of the '052 application with the exception of the use of transferring and the properties of the synthesized extracellular matrix layer. Transferrin is disclosed as a preferred embodiment of the chemically defined medium recited in the claims of the '052 application (see ¶ [0042] of the published application, US 20080108134 A1). The components of the extracellular layer are also taught to be a preferred embodiment (¶ [0022]), and further considered an inherent part of the methods recited in claims of the '052 application. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
